
Owasys Quality and Environmental Policy

OWASYS is an engineering company that designs and manufactures wireless communication devices to enable remote monitoring and control of mobile machinery.

Our Mission is to create Open Platforms and provide Solutions for System Integrators and Service Providers in order for them to develop innovative M2M and IoT applications.

To fulfil our purpose, OWASYS undertakes to develop its Quality and Environment Policy and apply it to the *"design, development, production management and commercialization of wireless communications devices"*, so that it is appropriate to the purpose, nature, magnitude and environmental impacts of such activities and products, in accordance with the following guidelines:

- Deliver high-quality products and solutions that meet or exceed customer expectations and applicable requirements.
- Continuously develop our global competence and ensure a high level of service to our customers and partners.
- Evaluate and improve our processes to increase the satisfaction of our customers, colleagues, and partners.
- Apply a consistent and structured management approach, based on continuous improvement, to reduce negative environmental impacts.
- Comply with all legal and regulatory obligations of the countries in which we operate.
- Support a precautionary approach in our operations and throughout our value chain.
- Develop, use, and promote environmentally friendly technologies, products, and services in our operations and throughout our value chain.
- Use natural resources and energy efficiency, as well as recycle e-waste to maximise the metal recycling from available raw materials.

In this way, OWASYS undertakes to use all the technical, economic, and human means necessary to ensure that this Policy is documented, updated, and made available to clients and the public, as well as to be known, understood, and implemented by all members of the Organization, including all those who work for or on behalf of the Organization.
